Applied Data Science Project

L18 - Project proposals

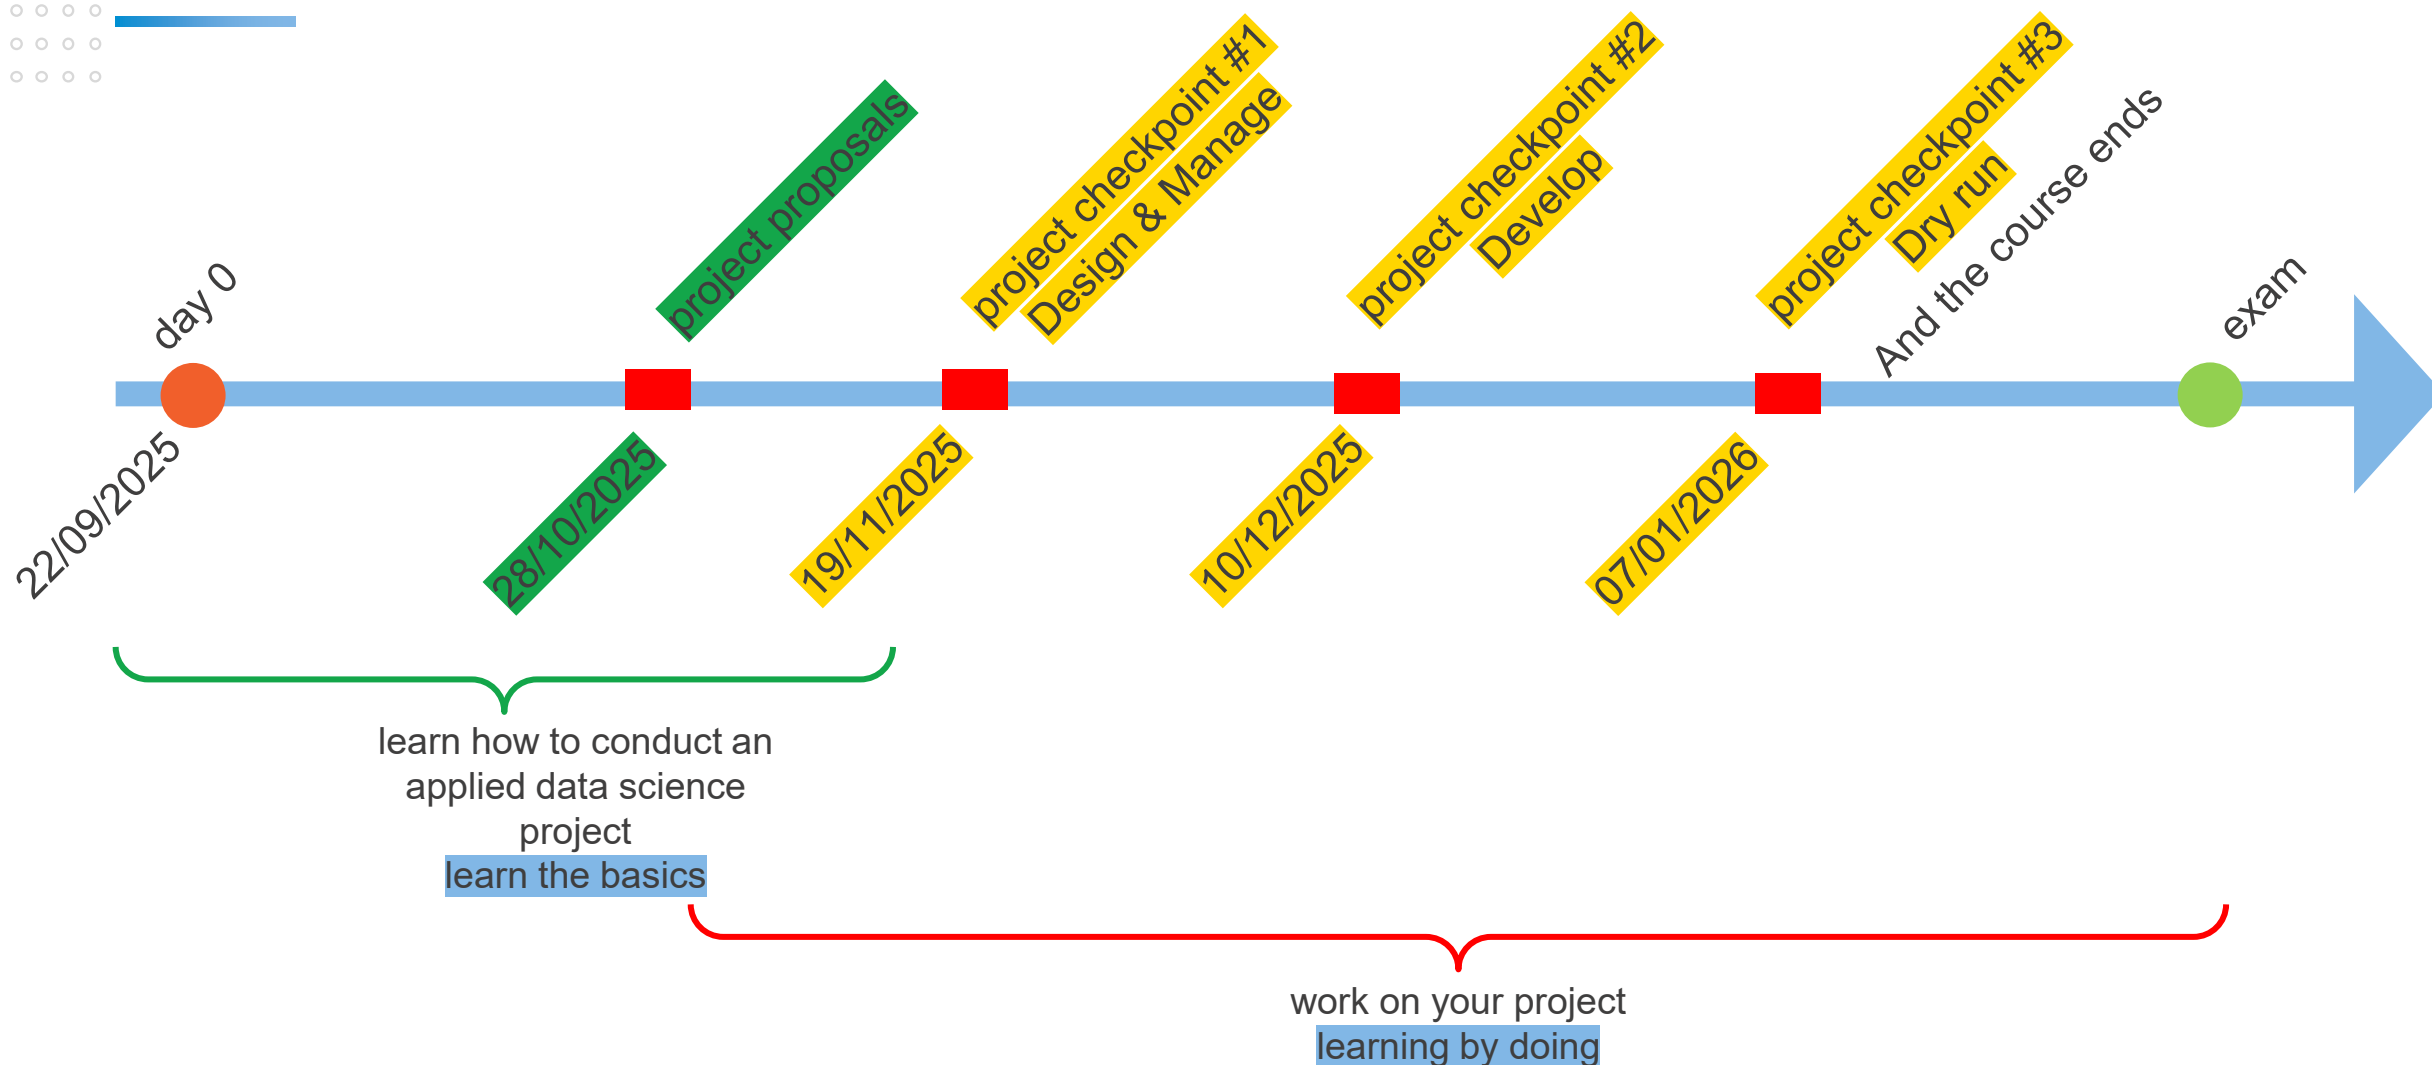

**Politecnico
di Torino**

e l i s
European Laboratory for Learning and Intelligent Systems

Course timeline

Projects

Project proposals are accessible from didattica.polito.it

Applied data science project -> Materials -> Teaching materials 2025/26 -> Projects

Deadline 02/11/2025

[Spreadsheet](#) where to express your interest

1) Make a team, each of 3 people -> Tab Student-Team

2) Express your interest(s) -> Tab Project-Team

Each team is free to express up to 3 preferences. The latter may be useful in cases of conflicts (practically, when will have more than one team for one project)

If you aren't in the list of students, please notify promptly

On 03/11/2025

I will consolidate the teams and projects and will resolve conflicts if any

Duties for the checkpoints

Checkpoints are **mandatory**

We expect that you are present (preferably onsite, we do accept online in particular situations)

During a checkpoint, each team will go on stage and present the status update of the work

Recall, also a status update presentation is supposed to give an overview of a scientific work, thus it has to have a scientific style

Checkpoint #1

Prepare a presentation reporting:

- project value proposition
- the general objectives of your project
- the design you made
- the management plan

Each member presents a portion

In total, it is expected to last 15 minutes

Checkpoint #2

Prepare a presentation reporting

- project proposition value
- the general objectives of your project
- hypotheses or research questions
- your development choices

Each member presents a portion

In total, it is expected to last 15 minutes

Checkpoint #3

Prepare a presentation reporting

- your project proposition value
- the general objectives of your project
- hypotheses or research questions
- method
- experiment
- conclusions

Each member presents a portion
In total, it is expected to last 15 minutes

Final output

Populate the repository you'll be assigned to after the consolidation of the teams

With an informative README

Notebook or a structured source code

Paper

3+1 Presentations (3 checkpoints, and 1 final)

Notebook

If Colaboratory is a constraint for the development of your project, then you are free to pick an alternative.
Recall to motivate the choice

The expected submission is either a notebook or a python project

Paper

Utilize the template <https://www.overleaf.com/latex/templates/association-for-computing-machinery-acm-sig-proceedings-template/bmvfhcdnxfty>

Presentation

You can decide to use any app for preparing your presentation

Recall, the expected submission is an editable version (for instance a Google Slides or PPTX) and a PDF

Thank you for your attention.
